State of the Industry is an annual report commissioned by the AFGC to provide economic indicators for the food and grocery manufacturing sector to inform rational and fact-based analysis and policy.

The report highlights where the strengths of the industry lie, identifying the greatest opportunities for growth and reinforcing the ongoing challenge of staying competitive in a country with high costs and low margins. Areas of focus include:

- Industry turnover
- Employment
- International trade
- Capital investment

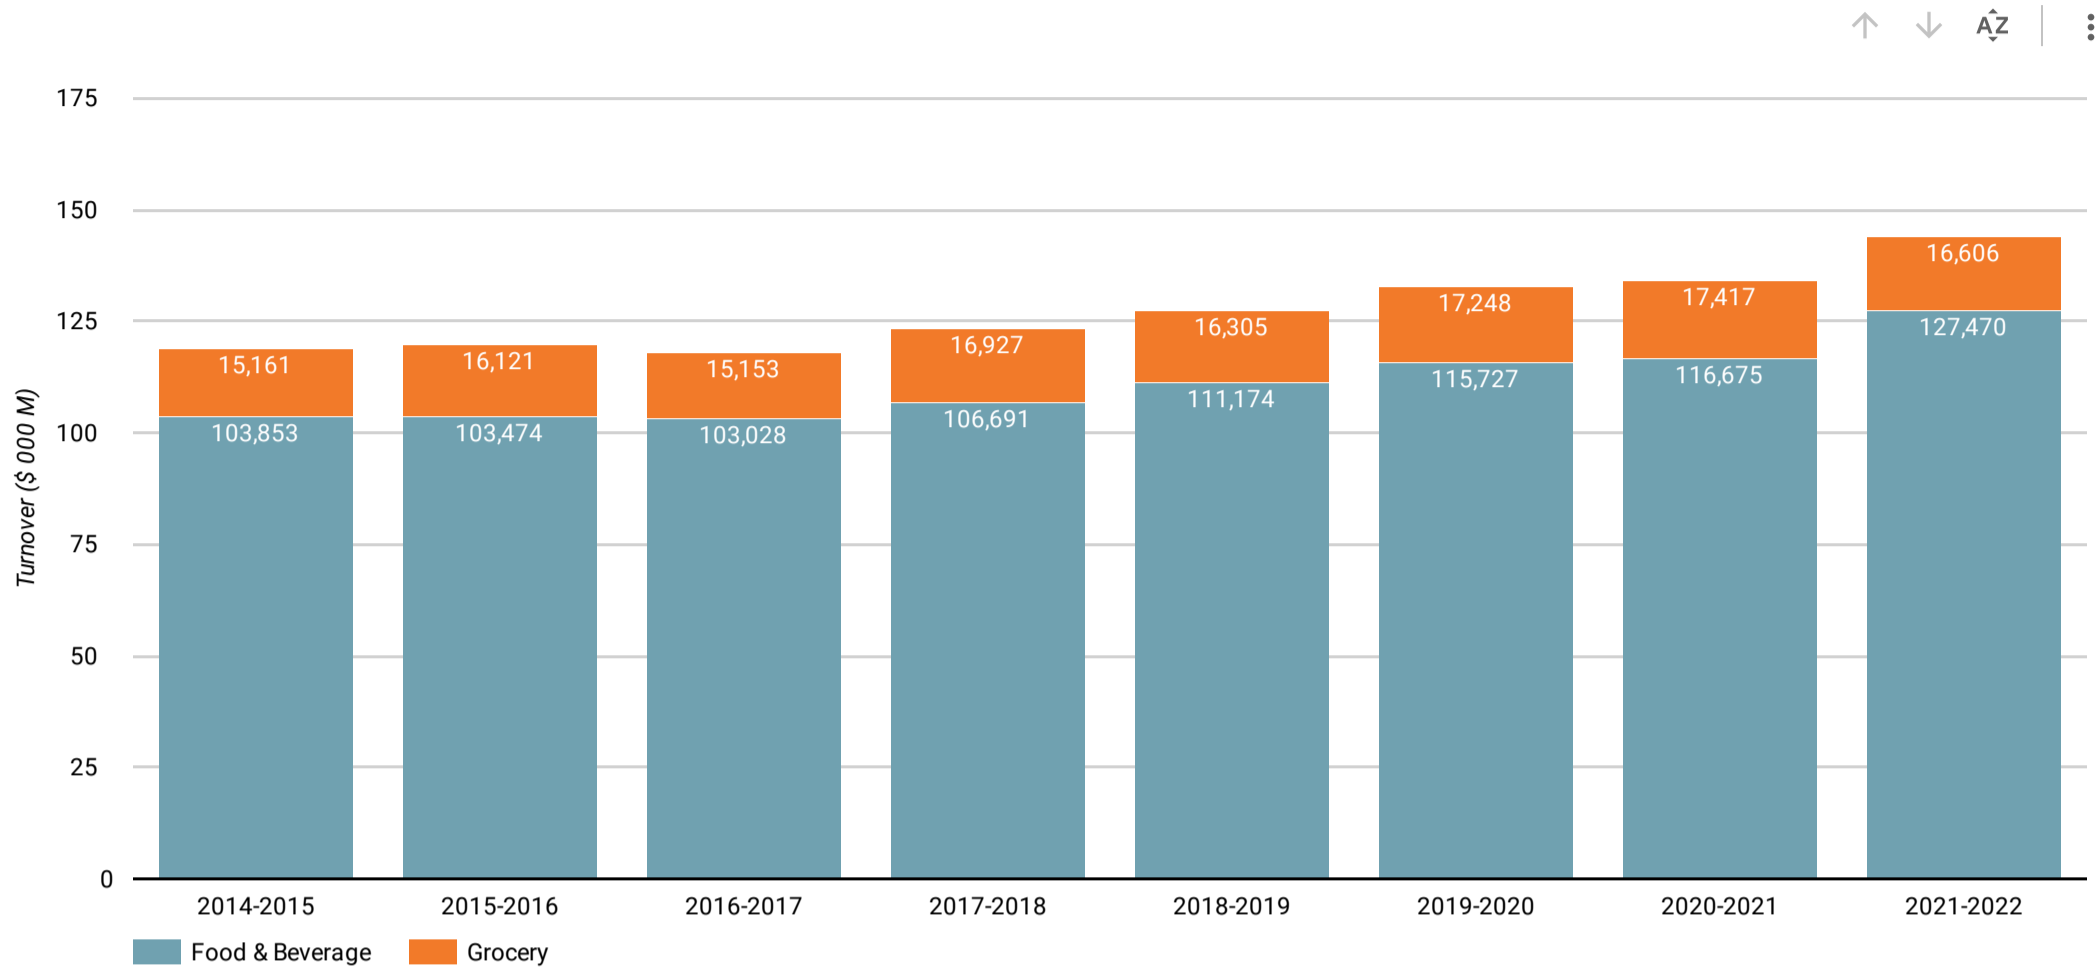

The data is derived from a number of publicly available resources, including the Australian Bureau of Statistics. Many of these data sources are updated over time as further information or revisions are made available. These changes are generally reflected in the following year's State of the Industry.
